## About me

### Why You Should Hire Me

I am a professional dedicated to the excellence of my projects, recommending technologies and strategies for each case.

Staying ahead of the curve is one of my top priorities

## Services I Offer

### WordPress Development

Through this CMS I carry out web projects that require quick solutions with low production costs.

### Web design

I design web layouts based on the results of graphic designers, implementing professional design tools such as Photoshop, Illustrator and Lightroom.

### Custom Programming

Customized solutions for more complex and specific needs.

### SEO

Through good SEO practices, I bring the project closer to the highest scores of the most popular search engines and social networks in the market.

### Technological Analysis

I carry out studies based on the areas and needs that the client has or may have in the future, recommending appropriate technologies for each case.

### Digital marketing

Through my experience and professionals in different areas of marketing, I draw a strategy for the performance of brands and campaigns.

### Database

I carry out database implementations together with the development of applications on platforms such as MySQL, Microsoft SQL Server and MongoDB.

### e-commerce

Thanks to CMS such as WooCommerce, Magento, PrestaShop, Joomla or even with custom development, I have managed to launch various e-commerces on the market with great profits in their results.

### Analytics

The measurement of the results and problems of an online project are essential for its progress. That is why I specialized in the implementation and management of Google Analytics.

## What is my professional experience?

I have been working as a freelance web developer for 12 years, applying mainly to projects with CMS.

I have had the opportunity to work for private companies and public entities.

Currently, I am looking for a job that enriches me as a professional, where I can collaborate on large scale projects with experts in the area of web development.
